WELCOME MESSAGE

Dear Colleagues

It is our pleasure to welcome you to Chennai for the Maternal Medicine Summit on the 21st and 22nd of November. This program focusses on identification and management of women with Medical disorders during pregnancy. The number of women we are taking care of who have pre-existing medical problems or develop complications in pregnancy is increasing. This is an area where we need to update ourselves with the changing guidelines and management paradigms.

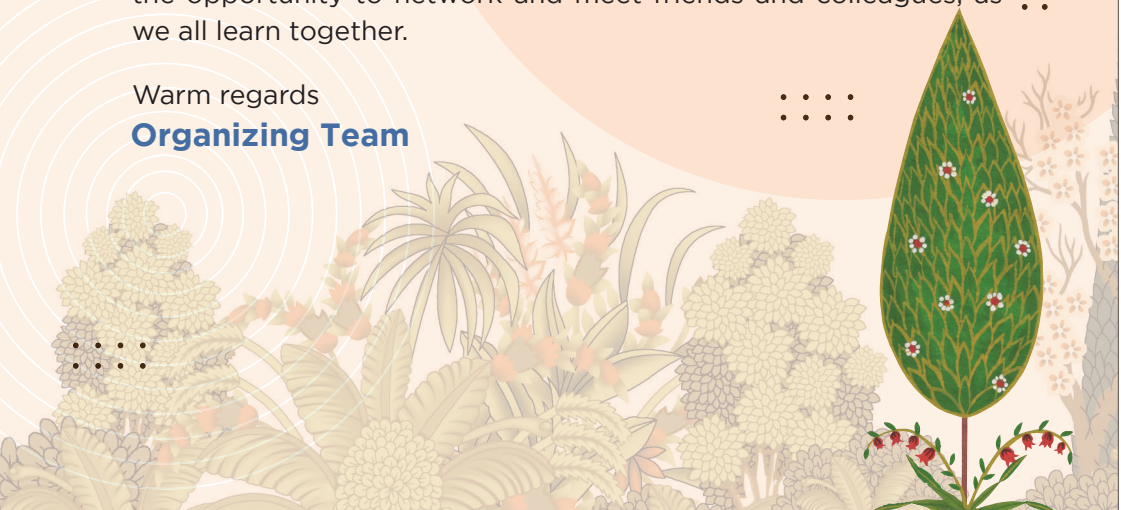

The faculty has been identified for their expertise and will bring to the meeting, cutting-edge research besides evidence-based clinical management. Through a combination of lectures and case-based discussions our aim is to tease out the day-to-day challenges in our practice.

We are confident that this will be a well spent two days. This is also an opportunity to submit your work as paper and poster.

We would love to see you in a brand new venue in Chennai, share the opportunity to network and meet friends and colleagues, as we all learn together.

Warm regards

Organizing Team

INTERNATIONAL FACULTY

Prof Laura Magee
Professor
Global Women's Health
King's College Hospital
King's College London, UK

Prof Peter von Dadelzen
Professor
Global Women's Health
King's College Hospital
King's College London, UK

Prof P Saravanan
